This Workshop examines the Collaborative Model of Interpreting and an approach to teaming that departs from the "on" & "off" interpreter teaming and approaches the work in a collaborative, "always on" way. Another key component to effective interpretations is preparation as one way to make the content of interpreting more manageable. Barbara-Jean will guide participants in a discussion of the importance of working with those on the entire team including other interpreters and the hearing and deaf consumers. This session includes a discussion of how to apply the Collaborative Model of Interpreting to your work as well as a brief application activity.

Please bring your own lunch!
