

**EDUCATORS
POLICY MAKERS
RESEARCHERS**

**Why should you attend
the fourth
IMBES Biennial Conference?**

- ◆ Develop long term collaborative partnerships and deeper understandings of the relationships between cognitive science, neuroscience, and educational practice.
- ◆ Build relationships through an understanding of how existing research and new areas of research will create and foster effective educational interventions.
- ◆ Explore current research methods and tools that will encourage further conversations and thinking.
- ◆ Identify collaborative strategies and new research agendas to address educational policy and the connection of mind, brain and education.

Fourth Biennial
**International Mind, Brain and
Education Society Conference**

November 6—8, 2014

**The Worthington Renaissance
Fort Worth Hotel**
Fort Worth, Texas

Sponsored by:

University of Texas at Arlington

*Supported by National Science Foundation
under grant # DRL-1434973*

General Information

The fourth biennial conference of the International Mind, Brain, and Education Society will provide a forum to explore exciting new advances in the emerging field of Mind, Brain and Education.

The IMBES conference encourages and supports collaborative work among cognitive and developmental scientists, educators, neuroscientists, and policy makers. These efforts can generate new insights into behavior and the brain as they inform both educational practice and new scientific investigations.

Program

The conference begins on Thursday, November 6, at 5:00 P.M. The opening session will be followed by a get-acquainted reception sponsored by UTA President Vistasp Kharbari.

Friday and Saturday will offer workshops, symposiums, poster sessions, and opportunities for discussing pertinent issues that emerge at the intersection of mind, brain and education.

A complete schedule is available at www.imbes.org.
